INTRO

- Explain why your study matters in the fastest, most accessible way possible to the audience (feel free to add graphics (with alternative text)!).

METHODS

1. How did you find this?
2. Collected [what] from [population] etc.
3. How you tested it.

RESULTS

- Graph/table/text with **essential results only**
- All the other data in "SUPPORTIVE DATA/PLOTS/ETC"

DISCUSSION

- What did you find? Is it new? Is it true? Put your results/findings into context but be concise and minimal in text.
- Bullet points can be a nice tool here.

- Extra Graphs
- Extra Tables
- Extra Figures
- Extra nuance that you're worried about leaving out

This section is for the data that will support your findings for the data interested audience.

This is our version of APA mod and Mike Morrison's Better Poster. Keep what works for you. Change what doesn't.

Tips by Mike Morrison:

1. Keep **font size** as high above **28+** as possible.
2. Keep your summary tight. **Think** of it like "**abstract+**" with key figures only.
3. The **more content you add here**, the **more cognitive load** you add, and the more you'll turn people off engaging.
4. *Less content = more readers.*
5. Now **delete this text box.** 😊
